#HumanisticManagement

@HumanisticMgmt

No life will be left untouched by the **digital revolution** which brings both, great **opportunities** as well as **risks** and both are frequently connected to questions of sustainability and the desirability of **consequences technology brings** to humanity. The theme of our **2018 flagship event** therefore is **Technology, Sustainability, Humanity** and where better to discuss this topic than in the tech hub, **Bengaluru, India** on the birthday of **Mahatma Gandhi**.

Interactive programme over two days offering **keynotes, workshops, paper sessions panels,** ample **networking opportunities** and the **launch of the Humanistic Management Network India Chapter**

Discuss the **main tenets** of **Humanistic Management** and their connection to **technology**:

- **Respect for Dignity**
- **Ethical Reflection in Management Decisions**
- **Stakeholder Engagement**
